

World Cup of values

Instructions: Print off this sheet. Then add your 8 words to the column on the left putting the word you'd randomly assigned as number 1 at the top, adding the others down to number 8 at the bottom. Make sure you obey the random order you put the words in earlier. This now becomes a World Cup competition and only one 'team' or word can win and go through to the next round. So, words 1 or 2 are now in competition and you must decide which one wins and goes through to the next round. When you've decided on the first pair, do the same for words 3v4, 5v6, and 7v8. Now decide which of the final four words go through to the final, and then which word wins the final. How you decide which word wins is entirely up to you.
