

ASSESSING PLAY

Questions for learners and teachers

Teachers should be able to explain to the learners:

- What is to be learnt - the learning intentions?
- How the learning intentions are linked to the bigger ideas and understandings that the learners will learn?
- How will the students be learning?
- How the learning activities are relevant to the success criteria?
- How learners will demonstrate their learning - what learners will say, make, write or do with reference to sample assessment tasks?
- How this new learning will impact on future learning?
